

Jacquard Dye-Na-Flow

Please note: Zigzag Catalogues do not have prices on them. For the current price of an item please enter the [Zigzag Online Store](http://www.zigzag.co.nz) and use the search function to search the stock number or the description. If the item is currently in stock it will appear along with its price. If the item is not found after a search, then it is out of stock or has been deleted. Email us at sales@zigzag.co.nz if you would like to know the availability of the item.

Dye-na-flow (Actually a paint but it flows like a dye)

Dye-Na-Flow is a free flowing, highly concentrated liquid colour for use on any untreated fabric. It will spread on fabric until it is thoroughly absorbed. Every fabric has a different flow and spread. It is magical on silk, but it works on any type of fibre, natural or synthetic. On silk it has an even lustre. On velvet it is rich. On cotton the colour does not alter the feel of the fabric. Dye-Na-flow is incredibly versatile. It is perfect for silk painting including the serti technique with resist, spray on tie dye, watercolour, airbrushing, salt techniques, spritzing through stencils, sponge printing and simplified batik or wax resist effects.

It is perfect for airbrushing, silk painting, spray-on tie-dye, watercolour techniques, batik or wax resist effects. It is also great for marbling and more!

Dye-na-flow can be used in place of Procion dyes for tie-dyeing. Dye-na-flow requires heat fixing by ironing or being placed in a clothes dryer. Jacquard Airfix (see auxiliary section) is an alternate means of fixing commonly used in production runs.

Available in 30 colours and four sizes:

66.5ml (2.25 oz) bottle Code JPDF1-

236ml (8-ounce) jar Code JPDF2-

946ml (One-quart) jar Code JPDF3-

3.78 litre (one-Gallon) jar Code JPLN4-

PLEASE NOTE: Larger sizes currently by INDENT ONLY

Dye-Na-Flow is actually a textile paint made to simulate a

dye. Its extreme versatility lends itself particularly well to watercolour and serti (resist) silk painting techniques.
