

# Lumiere and Neopaque Paints

Multi-Surface Airbrush Colours  
 18 fabulous metallic paints and 16 opaque colours  
 Permanent, flexible, smooth, dry-cleanable and lightfast.

The palette is a lavish assortment of intermixable colours. They are truly opaque and bright, even on dark backgrounds and their high pigmentation provides excellent coverage with just one pass of the airbrush. (25% water mix required for airbrushing)  
 Both Lumiere and Neopaque are suitable for application to natural and synthetic fabric, leather, wood and paper. Lumiere offers a stunning assortment of metallic and pearlescent colours. They brush on like butter and are designed not to spread. This allows for smooth

application to soft uneven surfaces like fabrics. When dry they remain soft and flexible. They are opaque and therefore bright, even on dark backgrounds. The three Hi Lite colours are meant only for dark surfaces. Both Neopaque and Lumiere can be painted, screen-printed, airbrushed (when diluted) stencilled, marbled and stamped.

Available in 30 colours and four sizes:  
 66.5ml (2.25 oz) bottle Code JPLN1-  
 236ml (8-ounce) jar Code JPLN2-  
 946ml (One-quart) jar Code JPLN3-  
 3.78 litre (one-Gallon) jar Code JPLN4-

**PLEASE NOTE: We are holding stock of some colours in 236ml size All other larger sizes currently by INDENT ONLY.**

	556 Halo Blue Gold		557 Halo Violet Gold
	579 Flowable Extender		

**8 New colours releasing January 2006 Due in New Zealand in March 2006**

# Lumiere and Neopaque Paints

Neopaque has a similar consistency to Lumiere. However they are designed primarily to cover dark grounds with a light application and they are not metallic. Mixing the Neopaque colours to create antique gold's and an extensive range of metallic colours can expand the range of Lumiere colours. Add Hi-Lite colours for subtle, reflective, opalescent effects and super sparkle for extra glitter. When used on light or white fabric the colours produce a subtle "designer palette" alternative, a more intense colour scheme. Neopaque 576 extender is also a suitable medium for Pearlex pigments. Both Neopaque and Lumiere can be screened, painted, stencilled, marbled, stamped or brushed on with a soft brush.

## Neopaque

Extend the life of your paint by adding flowable extender without compromising the existing colour.
