

The Polyform Family of Polymer Clays

Original Sculpey

The original Polyform products oven bake clay! Sculpey is soft and pliable, works and feels like ceramic clay, but will not dry out when exposed to air. Shape it into your desired form and bake according to package instructions. Once cool, it can be sanded, drilled, carved, and painted with water-based acrylics or Sculpey brand glaze. It's ideal for sculpture and children's projects.

White available in these sizes

S2 White – 795 gm (1.75lb)

S8 White – 3.6 kilo (8lb)

S24 White – 10.5 kilo (24lb)

Super Sculpey

- The Ultimate Sculpting Compound!
- Used by Movie Studios and Professionals Worldwide
- A Favourite with Doll Makers

Available in these sizes

SS1 – 450gm (1lb box)

SS8 – 3.6 kilo (8lb)

SS24 – 10.5 kilo (24lb box)

History

In response to the popularity of Sculpey, Super Sculpey was formulated. Users required clay of greater tensile strength and Super Sculpey was the answer.

Characteristics

In colour, Super Sculpey is a translucent pink-beige only. Like Sculpey, Super Sculpey is an easy to condition polymer requiring minimal hand kneading or rolling through a pasta machine to prepare for use. It features fine tooling and detailing characteristics, and does not "fill in" after tooling. If you opt to paint your cured piece, we recommend acrylic paint or the application of water-based glaze prior to painting with oils. Paint should be applied in thin washes rather than thick coats for the best paint to clay bond. After curing, Super Sculpey bakes to a ceramic-like hardness and can be sanded to a fine smoothness.

Curing

Super Sculpey should be cured in a preheated 130 degree C (275 degree F) oven for 15 minutes per quarter inch of thickness. **DO NOT MICROWAVE.** For example, a piece of ½" thickness would be cured for 30 minutes. The layering method is recommended for larger pieces of construction.

Use

The translucent pink-beige colour has made Super Sculpey the favoured polymer of many art doll makers. Because of the fine tooling and detailing characteristics of Super Sculpey, it is frequently the chosen clay for making prototypes from which moulds are made from the Super Sculpey sculptures; then reproductions are made using the moulds. Additionally, artists are producing finely detailed finished sculptures using Super Sculpey.

Storage

Sculpey polymer clay products should remain fresh if properly stored in a cool place, away from heat and direct sunlight

The Polyform Family of Polymer Clays

Sculpey Living Doll Modelling Compound

Sculpey Living Doll is an outstanding clay with excellent sculpting properties and is used by doll makers worldwide.

It comes in a lovely flesh colour that is slightly translucent to simulate human flesh. The soft texture is smoothable and easy to work.

This clay is extremely strong after baking.

The clay can be tinted with coloured clays from the Premo Sculpey range to make ethnic skin mixtures of all kinds.

PPZSLD1 – Beige - 454 gms (1lb)

PPZSLD2 – Brown - 454 gms (1lb)

PPZSLD3 – Light - 454 gms (1lb)

- Professional quality oven bake clay
- Stays soft and pliable until you bake it – won't air dry
- After baking, permanent creations can be painted, sanded, carved and drilled.
- Perfect for Sculpture, doll making and prototypes
- Semi translucent finish

Super Sculpey Extra-Firm Sculpting compound

A Sculptor's dream

Many sculptors desire an extra firm clay that can be "carved" and used for projects that require fine details.

Meet Super Sculpey® Firm – the extra firm sculpting clay that is grey in colour, allowing sculptors to create fine details, and photographers to catch these fine points in film. Unique in both form and colour, this new sculpting clay will bring creative options to the sculpting world.

SS1Sculpt – 454 gms (1lb)

- Firm texture is perfect for sculpting fine details
- Grey colour makes clay easy to see and photograph
- Shatter and chip resistant
- Artist quality
- Paint to finish
- Non – Toxic

The Polyform Family of Polymer Clays

Super Sculpey® Ultralight™

PPLW2001 – 292gms (10.3 ozs)

Sculpey UltraLight is the newest and most versatile member of the Polyform family of clays. UltraLight is lightweight and extremely soft but bakes so hard that it won't crack or break, even in larger pieces. However, UltraLight remains flexible when rolled thin, so it is ideal for paper crafts, especially for personalized embellishments or to duplicate add-ons at a fraction of the cost.

This soft, easy-to-handle clay can be used to create just about anything. UltraLight can be used as a filler for

polymer clay beads, helping to keep jewellery - especially larger pieces - light and comfortable. Used to create decorative accents, drilled, buffed and painted with 100 percent acrylic paints, right along with the rest of the project. This versatile new floating candle holders or bathtub toys. Making Christmas ornaments that don't cause tree branches to sag is a trick with any craft. New UltraLight is the perfect medium for ornaments, especially large ones.

the baked-hard clay can be sanded, percent acrylic paints, right along with the product even floats, making it perfect for

any craft. New UltraLight is the perfect medium for ornaments, especially large ones.

UltraLight is a great replacement for tin foil armatures, offering a smoother base for clay projects to be built around. Because it bakes so hard that it won't crack, larger sculpting projects are finally possible with UltraLight foundations. In addition to accepting paint beautifully, when covered with Sculpey and Premo clays, the new ultra-light clay chemically bonds together with the covering material to make the final project even stronger.

Sculpey Ultralight is an extremely versatile clay that allows you to do things that could never be done before with clay. It turns hard as a rock when baked so it won't break or crack, even in large pieces. When rolled thin and baked, the clay remains flexible, making it the ideal product for paper crafts. Sculpey Ultralight even floats! This soft, lightweight and easy-to-handle clay can be used to create just about anything. Sculpey Ultralight can be colored by mixing it with Sculpey III or Premo polymer clay.

When used as a base for armatures or large beads, shape Sculpey UltraLight to desired form and bake. Remove from oven and allow cooling. Cover Sculpey UltraLight to desired form and bake. Remove from oven and allow cooling. Cover Sculpey UltraLight base with Sculpey III or Premo clay and bake again. Sculpey III and Premo clay will chemically bond to the Sculpey UltraLight base when baked and make the final piece strong and crack resistant.

Once cool, baked pieces can be polished, sanded, drilled, carved and painted the 100% acrylic paints. If using oil-based or water-based acrylic paints, seal with Sculpey Glaze before painting. Pottery or dishes made from Sculpey UltraLight should be used for decorative purposes only, not with food, beverages or smoking

materials. Bake in an oven-proof glass or metal surface at 130 C (275 F) for 15 minutes per 6mm (1/4") thickness. DO NOT USE MICROWAVE OVEN. DO NOT exceed the above temperature or recommended baking time. Remove from oven and allow cooling. Supervise children during baking.

The Polyform Family of Polymer Clays

Studio™ by Sculpey®

Studio™ by Sculpey® is opening the door to a new world of creating with oven-bake clay. Specially formulated to capture and build upon the best qualities of today's oven-bake clays, Studio is easy to condition by hand and extremely durable after baking. It is the only oven bake clay that will hold its shape perfectly during modelling and will not break or crack when baking large pieces. It is available in 34 rich, home décor colours and bakes to a luxurious, suede-like finish.

Sculpey III

Wonderfully Soft and Pliable Right from the Package
44 Vibrant Colours

Excellent for General Crafting of Jewellery, Figures, and Home Décor items
Packaged individually in 56gm (2oz) packages and a 30-piece Sampler assortment.

Sculpey III is a favourite Polymer Clay! This fun and easy to use modelling medium bakes to a smooth, matte finish in your home oven.

Characteristics: Conditioning is easy with Sculpey III: simply knead for a few seconds, and you're ready to create! This popular polymer maintains tooling and detailing beautifully. Once cured, Sculpey III bakes hard and takes on a matte, bisque type finish. Sculpey III can be easily mixed to form your own custom palette and can be mixed with other Polymers. Try it you'll love it!!!!

Curing: Sculpey III should be cured in a preheated 130 degree C (275 degree F) oven for 15 minutes per quarter inch of thickness. DO NOT MICROWAVE. If you're unsure whether your piece is adequately cured, try pressing the tip of a fingernail into the bottom of your piece after it has cooled; it will leave a mark but will not actually enter the clay.

Use: Use Sculpey III for compact figurines, jewellery, home decor and Millefiori canes. The sky is the limit with Sculpey III.

Hint: Give Sculpey III items a high gloss shine by sanding them with 400 and then 600 grit wet/dry sandpaper. Sand under running water. Once finished, polish your creation with a piece of denim fabric (or use a bench grinder to buff it with a muslin buffing wheel). If sanding and buffing aren't your choice, brush one or more light coats of Sculpey Glaze on the piece and allow to dry!

Storage: Sculpey polymer clay products should remain fresh if properly stored in a cool place.

Sculpey III Multi Packs

MP-30-1– Sculpey III Multi Pack

One of Polyform's all time best sellers! Makes the perfect creative gift.

Sampler and Multi Packs are a great way for adults and kids alike to economically experiment with the multitude of colors available in Sculpey III.

The Sampler holds 30 - 28gm (1 oz). bars from the Basic, Bright, and Pearl color ranges. Includes detailed instructions and two project sheets!

MP-0001– Sculpey III Multi Pack – Classic

MP-03001– Sculpey III Multi Pack – Naturals

MP-05001– Sculpey III Multi Pack – Bright Ideas

MP-10001– Sculpey III Multi Pack – Pearls and Pastels

Each set contains ten 56gm 2oz. bars and are categorized by colour family: Basics, Naturals, Brights and Pearls...

The Polyform Family of Polymer Clays

Premo! Sculpey

- Firm, Smooth Texture.
- Artists' colour palette.
- Great for colour mixing!
- Extremely durable after baking.
- Perfect for millefiori
- **Available in 2 oz. bars and 1 lb. bars.**

Characteristics

Premo! Sculpey quickly reaches a workable state with minimal conditioning and remains soft and pliable while offering extra resistance without crumbling. It is available in 32 colours, including a lustrous Gold and Silver, and a series of pearlescent colours. Its artists' colour palette is modelled after oil paint colours and designed to make Colour mixing a snap. Mix Premo! Sculpey with other polymer clay colours, powders or pigments for interesting colours and textural effects.

Sculpting is a joy as it responds to the movements of your hand or tool and holds a sculpted line without "filling in." Jewellery makers will enjoy the ability of Premo! Sculpey to be used in their Millefiori.. Premo! Sculpey canes are best cut with a very sharp blade using a rocking motion. A little practice makes this technique second nature! And to top it off, creations made from Premo! Sculpey will be around for a long time, because it is formulated to be a strong and durable polymer clay. Premo! Sculpey is not brittle after baking. In thicker areas it is hard and rigid and in delicate areas "flexes" to reduce the risk of breakage. Whether you're a sculptor or craftsperson, beginner or professional we think you will love the benefits of Premo! Sculpey.

Curing

Premo! Sculpey should be cured at 130 degrees C (275 F) in a preheated oven for 30 minutes per quarter inch of thickness. DO NOT MICROWAVE. Once cured, the colours intensify and deepen.

Use

Use Premo! Sculpey for jewellery, home decor, and sculpture. Doll makers may mix Translucent Premo! Sculpey with Super Sculpey for increased translucence and strength. Premo! Sculpey is very beneficial used as a "backing," providing greater strength and stability to the item being produced. The lustrous Gold and Silver colours make Premo! Sculpey perfect for jewellery.

Storage

Sculpey polymer clay products should remain fresh if properly stored in a cool place, away from heat and direct sunlight.

The Polyform Family of Polymer Clays

Translucent Liquid Sculpey (T.L.S)

Available in 2 sizes

PPTLS02 – 56ml (2oz)

PPTLS08 – 185ml (8oz)

Translucent Liquid Sculpey (TLS) is liquid polymer clay, and it opens a whole new arena for artists and crafters alike! It is a bakable transfer medium for the new millennium! When artist's oil paints are mixed with it, it can be an enamel, a glaze, or a backfilling compound. When pigments or mica powders are mixed with it, it can be a stipple, a metallic glaze, or a grout for polymer clay mosaics. TLS is a fantastic transfer medium, also. It is a terrific adhesive agent. Its adhesive qualities are activated only after baking. It increases the clay-to-clay bond between raw layers of clay, and when adding raw layers to previously baked layers. Baking temperatures are similar to solid polymer clay, but translucence increases when the temperature is bumped to 150 degrees C for a short period of time. This technique takes careful attention and a well-calibrated oven!

Uses:

- Make transfers from
- Offset printed images like magazines, etc.
- Black & white and colour photocopies
- Coloured pencil drawings
- Add oil paints to make a bakable painting and surface medium
- Add dry pigments to create glazes and colour washes
- Create stained glass effect sun catchers and window clings
- Use with polymer clays for
- A bakable adhesive
- Grout for mosaics
- Creating faux enamelling
- A translucent glazing and polishing medium

Example of Coloured Pencil Transfer Technique

1. Colour your design with colour Pencils

2. Paint on Liquid Sculpey and bake

3. After baking, wash off paper

4. Design has permanently transferred onto Liquid Sculpey! Use the flexible image to decorate clay items, or windows or for decoupage!

For further instructions see separate Liquid Sculpey Section.

The Polyform Family of Polymer Clays

Mouldmaker - Super Elasticlay and Polymer Clay Conditioner

- Extra soft and pliable right from the package
- Shapes around intricate details
- Use as mould with plaster of Paris

PPE08 – 227gram (8oz)

Make flexible one-sided moulds with Super Elasticlay MOLDMAKER. Mouldmaker is extra soft and pliable to shape around even the most intricate of detail. After baking, an Elasticlay mould is permanent and flexible. Pour in Plaster of Paris or use it with a talcum powder release as a push mould for polymer clay.

Repairs picture frames, sculptures or makes moulds of your favourite creations.

Additional Use: Acts as a great "clay softener" when mixed with stiff clays. To soften stiff clay, add small balls of the Super Elasticlay MOLDMAKER incrementally until the desired consistency is reached. Usually about 1% of the original volume will be enough to soften stiff clays.

1. Find a one sided item to make into a mould
2. Press the item into a ball of Mouldmaker Super Elasticlay
3. Carefully remove the molded item and bake the Elasticlay mold
4. Make duplicates of your impressions with Plaster of Paris (no release agent required). Then paint and decorate as desired
5. Or, use Elasticlay mould with talcum powder release and polymer clay. After moulding, trim and bake polymer clay impression. Then paint and decorate as desired

The Polyform Family of Polymer Clays

Sculpey Eraser Clay

- Shape and Bake...then Erase!
- Mould, sculpt, stamp, pattern, blend, cut... just like regular Sculpey clays!

Amazing Eraser Clay is the all-new oven-bake modelling clay that becomes a real eraser after it is baked in a regular oven for ten minutes. Amazing Eraser Clay can be moulded, sculpted, stamped or patterned, just like regular Sculpey clays, to create a vibrant collection of usable erasers.

Available in 2 oz. bars, a 6-piece sampler and an 8-piece sampler.

8 Colour Clamshell Pack. Set includes: Eight 56-gram bars in Beige, Black, Blue, Green, Orange, Red, White Yellow; & Clay Roller.

PPFX4048 – 6-piece set

6 Colour Pinwheel Pack. Set includes: Six 28 gram bars in Black, Blue, Green, Red, White, Yellow; Modelling Tool, & Clay Roller.

Characteristics

Now America's favourite polymer clay comes in a colourful version that stays "rubbery and flexible" after baking! Available in eight colours, Bake 'n' Bend is the Non-toxic modelling compound that will not dry out when exposed to air. It stays soft and pliable until baked in a regular oven. Once cool, Super Flex remains bendable and flexible, which makes it extremely durable and virtually indestructible.

Adults will love Super Flex for its incredible durability and range of craft uses, and it's perfect for kids because now they can Make, Bake and Play with their creations!

Curing

Sculpey Super Flex should be cured in a preheated 130 degree C (275 degrees F) oven for 20 minutes per quarter inch of thickness. DO NOT MICROWAVE.

It's a breakthrough in nightglow technology! Four new Glow in the Dark Sculpey III colours that glow in their own colour! Green glows Green, Orange glows Orange, Blue glows Blue, etc.

This set comes complete with 4 - 2oz. bars of glowing Sculpey III, a clay roller and full colour instructions for making a Galactic Nightglow Mobile! This fun and easy to use modelling medium bakes to a smooth, matte finish in your home oven.

Granitex

Granitex Sculpey III: 56g(2oz)

Characteristics

Granitex is the clay you can take for Granite! Tiny fibres mixed into the clay create this unusual stone like effect. Mixing will not alter the appearance of the clay; it will maintain the illusion.

This fabulous clay is easy to condition and tool. Granitex is available in eight subtle, pastel tones which can be painted with water base acrylics and dyes if desired. Try mixing a bit of Sculpey III into the Granitex to create your own tint.

Curing

Granitex should be cured in a preheated 275 degree F (130 degree C) oven for 15 minutes per quarter inch of thickness. **DO NOT MICROWAVE.**

Use

Granitex can be used to make figurines, jewellery, and home decor. Miniaturists have found it very useful in making architectural detailing.

Hint: Use Blue Granitex to imitate Denim for clothing on figures. Cover an inexpensive glass vessel with Granitex and decorate it with Sculpey III flowers, birds, fruit, etc.

Rubber stamp Granitex with permanent pigments to create jewellery, plaques, paperweights, and home décor items. Kids enjoy customizing their light switch covers, and Granitex is a great partner with charms, moulds and small sculptures.

Storage

Sculpey polymer clay products should remain fresh if properly stored in a cool place, away from heat and direct sunlight.

Packaging

Granitex is packaged individually in 2-ounce packages and in a Sample Pack of eight 1-ounce pieces.

Sculpey Accessories

PPACR – Sculpey Acrylic roller

The acrylic roller is 8" long and 1" in diameter. Quickly roll clay into sheets. Non-stick surface. Cleans easily with alcohol.

PPAB - Sculpey Super Slicer

Each set comes with 2 super sharp blades that are perfect for cutting all types of clay. The flexible blade allows for curved cuts and slicing smear-free millefiori canes. Suggested for adult use only

PPABS – Slicer Blade Assortment

Each set comes with 3 blades. A flexible blade, a stiff blade and a wavy blade. All super sharp

PPAT301 – Sculpting tools

Get professional results with these three sturdy polypropylene sculpting tools. Sized right for both children and adults to use, they are useful for smoothing and carving unbaked clay items. Set also includes a roller for rolling clay into flat sheets.

PPATHERM - The Sculpey Oven Dial Thermometer.

Designed for polymer clay, highly accurate, hang or stand, durable stainless steel

PPACG1 – Sculpey Clay Gun

This indispensable tool has 19 interchangeable discs for making leaves, clovers, rope, braid, bricks, and tubes, grass, hair and more!

Made from top quality die-cast steel, this extruding tool provides a simple way to add attractive textural details to your polymer clay projects! The tool disassembles into three parts for easy cleanup with soap and water.

SD1 – Sculpey Clay Softener 28ml (1oz)

Rescue old unbaked clay! Sculpey Clay Softener is a softening agent, which will improve the texture of clays that have become dry and crumbly. Use sparingly by adding a few drops and kneading into the clay until it softens. Also, great as an adhesive agent; apply sparingly to parts that will be attached to each other to increase the clay-to-clay bond!

SCG – Sculpey Gloss Glaze 33ml (1.2 fl oz)

SCM – Sculpey Matte Glaze 33ml (1.2 fl oz)

Add a durable seal or finish to baked polymer clay items with these compatible acrylic water-based finishes. Apply thin washes with a small brush. You can thin glazes with water if desired.

The Polyform Family of Polymer Clays

Using EZ Release Moulds

Finally, a line of push moulds that make the clay just as easy to get out of the mould as it is to get in. Our revolutionary flexible mould material means no messy release agents are needed. Simply mould, flex and release. Yes, it's that easy!

But wait, there's more! Not only did we make moulding easy, we created outstanding designs and themes from top designer Shelly Comiskey.

Push moulds are great for beginners and first time Sculpey users.
