

## Jacquard Red Label Silk colours

Artwork by Natasha Foucault

**Red Label Silk Colours: This predictable dye yields deep shades, continuous tones, pure primaries and beautiful transparencies.** Geared towards professional artists and productions studios, you can put this dye through its paces and it will perform. Ideal for traditional silk painting or painting on cottons and rayon it is also used in many specialty applications utilizing discharges, chemical resist, printing and diffusion techniques.

Red Label colours are modified reactive dyes concentrated for economy—they are twice the concentration of the Jacquard Products Green Label Silk Colours. Red Label silk colours are set by steaming.

Available in 20 colours and two sizes:  
236ml (8 ounce) jar Code JPSCR2-  
946ml (32 ounce) jar Code JPSCR3-

**PLEASE NOTE: We do not currently hold any RED Label Silks dyes in stock. All orders by INDENT ONLY**

"Red Label" Formula **MUST BE STEAM SET**. It is available in 236ml (8oz.) and 946ml (32oz) sizes ONLY. It is especially suited for professional artists and production studios.

## Instructions:

Painting with **Jacquard Silk Colours** is a fun and easy way to create beautiful, professional looking hand painted silk clothing and art. Use them to create gorgeous and unique scarves, clothing, wall hangings, pillows and more.

Because they are true dyes Jacquard Silk Colours do not stiffen the fabric at all and the natural lustre of the silk shines through. All 20 colours can be blended to create an infinite variety of brilliant colours or diluted with water to create soft pastels.

Jacquard Silk Colours flow freely on silk fabric. The three most common silk painting methods differ by how they control the flow of the dye. In the **serti method** a resist is used to draw lines that stop the flow of dye. The **antifusant method** coats the fabric with a substance that inhibits the flow of dye. And finally, the **watercolour method** allows the dye to flow freely.

The most common method is the serti method which we will describe first. Afterwards we will describe how the other two methods differ.

## Materials:

- silk scarf or fabric
- plastic cups or ice cube tray for blending colors
- brushes
- silk pins or tacks to stretch fabric
- paper towels
- resist (Gutta, Water Based or Permanent Metallic Resist)
- Jacquard Silk Colours
- water
- stretcher

## Prepare & Stretch the Fabric

Prewash to remove oils or dirt using Synthrapol or liquid detergent. Allow to air dry.

Before painting, the silk must be stretched tightly and suspended above the work surface. Inexpensive canvas stretcher bars are readily available at art stores & frame shops. Buy stretcher bars 1-2" larger than the silk you will be painting. Embroidery hoops are ideal for small projects and many art stores sell frames specifically made for stretching fabric. Adjust the frame to fit your fabric and attach the silk with stainless steel push pins or silk tacks. Begin in one corner and work your way around the frame, pulling it taut as you go.

## Apply the Resist

In the serti technique, lines are drawn with gutta on the fabric and the dyes are applied within these lines. When painted on, the dyes will flow and spread on the silk until it reaches the resist lines. The gutta resist acts as a boundary between colours

much like lead in a stained glass window. These islands of colour can be blended, highlighted or accented with other colours. (See watercolour technique below)

- Pour the resist into the dispenser bottle, replace the plastic insert and screw on the metal tip.
- If you are using a pattern, centre the pattern on your work space and place the stretched fabric on top of the pattern. Most silks are light enough that the pattern lines will be visible through the fabric. Trace the pattern with the gutta, or trace lightly with a pencil and then go over the pencil lines with the gutta.
- Hold the gutta bottle like a pencil. Gently squeeze the bottle until the resist begins to flow. It is a good idea to practice on a separate piece of silk or paper until you get the feeling of drawing smooth, flowing, continuous lines.
- Begin drawing your pattern. Move steadily, but not so quickly that you leave gaps in your lines. All lines must be connected or the dye will bleed through the gaps in the gutta line.
- Once you've completed the design, carefully examine the lines. Make sure the gutta has penetrated through to the back. Thin gutta with gutta solvent if necessary. Go back and fill in any gaps let gutta dry completely, usually 30 minutes. You can use a hair dryer to speed drying time.

### *Mix and Apply the Dye*

Although Jacquard Silk Colours are available in 20 shades, most colours of the spectrum may be mixed from three primary colours: yellow, magenta and cyan. Using the colours full strength will yield the brightest shades. For pastels, the dyes can be mixed with water. If your water is hard, use distilled water. Remember that colours will appear darker when wet.

- Pour a small amount of each colour you are planning to use into plastic cups or an ice cube tray. If you are mixing colours, be sure to mix enough colour to complete your project as it is sometimes difficult to recreate exact shades later.
- Dip your brush gently into a colour. Touch the brush to the fabric about 1/2" from the gutta line. The dye will migrate the rest of the way. Paint all areas inside the gutta lines. For large areas, work quickly painting the colour from corner to corner. Always work wet to wet. Never go over a dry area.
- Let dry 24 hours before steaming.

### *Setting the Dye*

Jacquard "Red Label" Silk Colours are set by steaming. For steaming instructions see the following:

- [Vertical Fabric Steamer Instructions](#)
- [Stove Top Steamer Instructions](#)

### *Other Methods of Application*

#### *Antifusant Method*

Instead of resist lines this method uses an antifusant that is spread on the fabric to inhibit the flow of the dye. Jacquard No Flow is an excellent antifusant for silk. Spread the antifusant liberally and evenly on the silk with a wide brush or sponge. Let dry. When painting dyes on the treated fabric use a "dry" brush -ie. Remove excess dye from the brush by dabbing it on a paper towel before painting. A build up of dye on the fabric will enhance spreading.

#### *Watercolour Method*

One of the most exciting methods of painting on silk simply involves letting the dyes spread and mix on the fabric. Beautiful free form watercolour effects are produced when silk is dampened and bunched on a sheet of plastic or plexiglass without stretching, allowing dye to flow into the folds producing a dramatic, textured appearance. Silk may also be stretched on a frame for the watercolour technique but will not have the textured appearance since there are no folds for the dye to flow into.

#### *Salt Technique*

A beautiful starburst effect can be achieved by sprinkling Jacquard Silk Salt on wet dye in any of the above methods. Jacquard Silk Salt is an "exploded crystal" salt which produces a stunning and dramatic burst of colour. Sea salt, table salt, kosher salt, rock salt and salt pellets for water softeners may also be used for different effects. Salt should be sprinkled on very wet dye and left on until the dye is dry for best results.

### Color Chart

All 20 colors may be blended together into an infinite range of vivid colors or diluted with water for pastels. For some specific mixes see our [mixing chart](#).

	701 Citron		722 Royal Blue
	703 Yellow		723 Sapphire Blue
	706 Apricot		725 Cyan
	710 Poppy Red		730 Turquoise
	712 Scarlet Red		732 Marine Green
	714 Carmine Red		735 Kelly Green
	715 Magenta		736 Viridian Green
	717 Digital		745 Brown Sienna
	718 Purple		750 Chocolate Brown
	721 Night Blue		759 Black

## Primary Colors Mixing Chart

Use the 3 primaries plus black in the proportions listed to create the desired color.

- For pastel shades add water
- All colors can be muted by adding a few drops of black.

Desired Color	Yellow	Magenta	Cyan	Black
Gold Yellow	25	1		
Orange	3	2		
Poppy Red	2	3		
Fuchsia Pink		15	1	
Digital		3	1	
Purple		1	1	
Blue Violet		1	3	
Cerulean		1	15	
Teal	2		15	
Blue Green	1		3	
Middle Green	1		1	
Lime Green	15		3	
Sepia	1	1	1	
Carmel	5	2	1	
Olive Brown	5	1	1	
Gray	5	4	1	
Zinnia	2	7	1	
Mauve		15	5	3
Wine Red	2	15	5	2
Dark Brown	1	1	1	1
