

# Shiva and Markal Paintstiks

Sometimes in the U.S.A some companies will produce the same item under two brand names. They have one for internal use and one for export. That is what happens with the company that makes paintstiks and whenever you see a project or tutorial written in the US using Shiva paintstiks then using a Markal brand is no different.

## Shiva/Markal Iridescent Artist's Paintstik Oil Colours

Unlike conventional oil colours, Paintstik Oil Colours are dry to the touch in 24 hours! They are perfect for sketching out shape, composition, and colour without messy palettes or mixing cups.

Colours can be spread or blended with a brush, knife, or Colourless Blender. The colours are completely compatible and can be blended with any oil paints. Use

turpentine to thin. They are made of wax, a small amount of low-acid linseed oil, and pigment. When the paints are not in use, a thin film or skin will form over the paint to keep the paint from drying up. Once the protective film is removed, Paintstik colours are the consistency of a lipstick or grease-paint. Paintstiks are solid, but softer than a pastel or crayon. The solid form of the paint makes them unique in the paint world – you can use the paint directly on fabric or paper (or any porous service) or apply the paint with a brush. There are no unpleasant odours or fumes, so you can paint virtually anywhere, at any time, and on almost any surface: canvas, paper, wood, plastic, metal, and fabric. They are non-toxic and hypoallergenic.

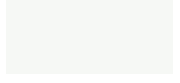

Shiva Iridescent Artist's Paintstik Oil Colours are self-sealing and permanent. Apply these paintstiks to fabric, paper, wood, floral arrangements, and more for a colourful shine.

Paintstiks are 11.5cm (4-1/2") Long x 1.3cm (5/8") Diameter. We endeavour to keep all colours in stock but this is not always achievable and occasionally we may need to order a colour in for you.
