

# Textile Colours and Fluorescents

Jacquard Textile Colours leave your fabric as soft as possible. Ready for direct application, Textile Colours can be applied with a brush, stamp, squirt bottle, airbrush, you name it! The colour is intense and semi opaque. When diluted with 25% water or colourless extender #100 they produce subtle pastels and blended transparencies. The extender prevents bleeding. These paints are absolutely colourfast on natural or synthetic fabrics. All colours can be blended with one another.

To Set: To fix the colours permanently, simply press on the wrong side with a hot iron. NB Jacquard Airfix can be added to eliminate fix time almost completely. Also used with difficult fabrics.

Available in 32 colours and four sizes:

66.5ml (2.25 oz) bottle Code JPTP1-

236ml (8-ounce) jar Code JPTP2-

946ml (One-quart) jar Code JPTP3-
