

Versatex by Jacquard

Screen printing Inks

These inks are ideal for silk screening, stencilling or block printing. Versatex has a thick creamy consistency. Versatex printing ink is ready to use from the jar. If the consistency is too thick for optimal use it can be thinned with water. The colours are intermixable, water soluble and transparent. Versatex is heavily pigmented but will not change the texture or softness of your fabric, nor wrinkle or bleed on paper. These semi transparent inks are most luminous on light coloured fabrics. For overlays increase transparency by adding VPI200 Versatex printing extender. They must be heat set for permanency and wash fastness on fabrics. For best results on paper, use cotton rag papers suitable for serigraphy.

Available in 47 colours and three sizes:

118ml (4 oz) jar Code JPVP11-

473ml (16-ounce) jar Code JPVP12-

3.78 litre (one-Gallon) jar Code JPVP14-

PLEASE NOTE: Larger sizes currently by INDENT ONLY
